

ESG Policy

At Syрма SGS, sustainability is at the core of our business strategy, and we commit to positively contribute to global Environmental, Social challenges by being proactive and solution oriented, engaging with stakeholders - customers, suppliers, employees, community at large and seamless integration of ESG (Environmental, Social & Governance) programmes in our operations, leading to sustainable living and long-term growth.

This policy document covers the following topics:

1. Purpose
2. Introduction
3. Philosophy and beliefs
4. Roles and responsibilities
5. ESG integration
6. Reporting, Targets and disclosures
7. Exclusions
8. Collaboration
9. Review

1. Purpose

The purpose of this policy is to describe Syрма SGS approach to incorporate Environmental, Social and Governance ('ESG') programmes, including climate change related risks, into its business. It also sets out expectations for various stake holders of Syрма SGS to consider ESG-related risks and opportunities while working with Syрма SGS

2. Introduction

ESG programmes are defined as any environmental, social or governance programmes that have the potential to materially impact the long-term sustainability of Syрма SGS operations.

- ESG programmes will cover all its stakeholders including customers, suppliers, employees, community at large
- ESG programmes can arise directly from its own operations, or in relation to the industry or regulatory requirements in which the company operates.
- Inadequate consideration of ESG issues can lead to business risks and syрма SGS is aware and adequately covered for risks thru various governing mechanisms

3. Philosophy and beliefs

At Syрма SGS, sustainability is at the core of Business strategy and the same is achieved through integration of ESG (Environmental, Social & Governance) programmes across all the business functions.

Three pillars of sustainability - Environment (E), Social (S), Governance (G) @ Syrma SGS,

Environment Pillar

@ Syrma SGS, Environmental management is considered as the first step toward sustainability and accordingly the environmental management system is reviewed and updated at regular intervals. Employees must incorporate the EMS contents into their daily operations.

Our environmental management efforts include,

- ✓ Comply with environmental protection laws and related rules
- ✓ Continuous improvements to environmental management practices
- ✓ Actively classify, recycle, and reuse waste
- ✓ Resource conservation measures
- ✓ Green House Gas Emission reduction

Social pillar

Our vision is to build an organization around entrepreneurial freedom and unleash the potential of our people to innovate and define the future of ESDM. We'll inspire and lead by being the catalyst for economic and social upliftment through enterprise.

People are the cornerstone of Syrma SGS sustainable development and this is clearly visible from our vision. we strive to create the most satisfying, rewarding and assuring workplace and the policies are in line with this principle. There is strong focus on Diversity @ Syrma SGS and our women employees contributes to more than 50 % of total workforce. We also conduct various training programmes and encourage growth from inside.

Workplace safety and health of employees has always been very important for Syrma SGS. A workplace with a healthy, happy, and safe work culture is what we ensure for our employees.

Governance pillar

Syrma SGS regards corporate social responsibility as an integral part of sustainable operation. We are a public Limited company listed for trading on the NSE (National stock Exchange) & BSE (Mumbai Stock Exchange).

The company operations are monitored by Executive Board which constitutes experts from various functions on regular basis under the leadership of Chairman.

Syrma SGS has established its board of directors pursuant to the “Company Act” and other relevant regulations and governance principles.

Compliance to various govt policies, rules, regulations is utmost priority @ Syrma SGS and the same is ensured by Company secretary & Compliance officer by strictly adhering to corporate governance policies and practices.

Board, Exe management of Syrma SGS is committed to sustainable development policies and goals and support operations fully to achieve the same.

4. Roles and responsibilities

To effectively manage ESG matters, the following is the structure:

- **Board** –Responsible for Syrma SGS overall ESG governance, compliance and performance, which includes setting the overall approach and direction for managing ESG risks and opportunities. This includes approving changes to this policy as well as any ESG related objectives.
- **ESG Committee** – Responsible for reviewing and providing input into the update of this policy, objectives. This includes oversight of ESG integration across the business functions.
- **Chief Sustainability Officer** – Responsible for overseeing the implementation and monitoring of the ESG programmes and reporting to the Board and ESG Sub Committee on material ESG issues that may impact business.
- **Compliance Officer** – Responsible for submitting necessary disclosures as stipulated by regulatory authorities
- **ESG Task Force** – supports the implementation of this policy through integration of ESG programmes into business operations.

5. ESG integration

Syrma SGS integrates ESG programmes during the following stages of the business

- Product Design, engineering
- Sourcing / Supply chain
- Manufacturing
- Product sales/shipping
- Capital Investment and New facilities design

6. Reporting and disclosure

Syrma SGS follows transparent reporting mechanism and had taken steps to digitalise the ESG data by introducing ESG tool. This tool supports tracking various metrics such as GHG emissions, Energy, water, waste, social metrics such as Diversity, Training, safety etc. Also, it provides information on general ESG topics for awareness and ensures compliance with the Business Responsibility and Sustainability Reporting (BRSR) requirements as mandated by SEBI.

Our short/Medium term ESG targets are as follows:

S.No	ESG Targets	Linked to SDG
1	Set up SBTi near-term targets aligning with 1.5 Deg C by Jul 2026	13
2	Reduce GHG emissions intensity, (Scope 1 +2) by 25 % in Near term by FY 30	7, 13
3	Increase energy consumption from renewable sources to 50 % in Near term by FY30	7
4	Reduce Scope 3 emission intensity in near term by 10% by FY 30	12, 13
